

Solidly at your side.

EX NOVO

The acquisition of assets of THURINGIA NETZSCH and ZEIDLER has allowed SAMA to extend its range of machines and spare parts even further. Consequently, assistance can continue to be provided to the customers of these companies. What's more, the new company set-up features full access to Sacmi's research and development facilities, thus making SAMA the most comprehensive tableware production partner in the industry. Strength has never been so reassuring.

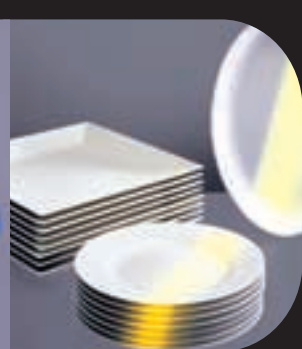

Machines and plants for
Ceramic Insulators
