

**Bryo soluzioni innovative
per generare energia elettrica
da fonti rinnovabili ed assimilate**

Bryo provides innovative solutions to generate electricity from renewable and other natural sources, primarily by way of PHOTOVOLTAIC and BIOMASS systems.
Bryo designs, builds and maintains photovoltaic systems and ensures their long-lasting performance and profitability by drawing on the unique skills of the four co-owners,

Bryo Four exceptional co-owners - Con.Ami, Sacmi, CTI and Cefla - for new energy solutions

Bryo Our success stems not just from what we do but who we are.
We have a mission: to invest ethically within the community.

Bryo: innovative solutions to generate electricity from renewable and other natural resources

Bryo's co-owners

Consortium providing essential utility services within a water catchment area covering 23 town councils in the provinces of Bologna, Ravenna and Florence.

For more than 100 years Con.ami has been building and expanding electricity, water resource management, district heating and waste disposal networks.

An international group and world-leading designer and producer of machines for Ceramics, Beverage & Packaging, Processing and Plastics; this leadership position has been achieved thanks to the application of innovative technology, strong positioning on world markets and a continuous quest for high quality and outstanding customer service.

The Cooperative owns considerable areas of land within the Imola district; here, a variety of fruit, vines and other crops are cultivated using advanced methods. In addition to these farming areas, of great importance to the company, CTI also has property and business interests concerning completion of construction work cycles. In industrial research, instead, the Cooperative has engaged in experimentation and development projects with ENEA to produce organic soil fertilisers and ameliorants. CTI responds to customers' needs by providing personalised solutions, ensures skilled assistance throughout every stage of work, invests in product quality and offers complete services. Experience, fast response times, an ability to listen and flexibility make CTI a reliable, punctual supplier to customers of all sizes.

Cooperative with four different business units that brings together skills and resources to achieve ambitious goals within their respective fields; the four units constitute a collective project in which a web of relationships and talents provide shared strength and support. Success through cooperation: a valuable heritage to be passed on to new generations.

1. civil and industrial plant engineering
2. shop-fitting solutions for the modern retail trade
3. systems for applying and drying paint on wooden items
4. dental industry
