COLORA CAP
DIGITAL PRINT

COLORA CAP is a new system created by SACMI for digital cap printing - offering the widest range of decorating options for these essential packaging components to make the most of their communication potential.

The process developed by SACMI enables to use high-definition digital images and import them into the printing system in just a few minutes, starting a new production batch without any format changeover costs.

An integrated vision inspection system ensures a real time check on print quality.

MAIN ADVANTAGES

Reduced format changeover costs (no need to change printing plates for each individual pattern and size);

Optimised logistics (printing is carried out in a contact-less manner, making it unnecessary to allow for a cap storage time before printing);

Reduced format changeover time (pattern and size changeovers are carried out in minutes via a digital process).

TECHNICAL DATA:

- Max output: 36.000 caps/hour (on 29mm diameter caps)
- Caps diameter range: from 20mm to 70mm
- Installed electrical power: 10,9 kVA
- Absorbed electrical power: 7 kW

SACMI: INNOVATIVE TECHNOLOGY FOR INDUSTRY.

SACMI is an Italian cooperative company and the world-leader designer, producer and marketer of industrial technologies and systems, specialized in machines and complete plants for Ceramics, Beverage & Packaging, Closures & Containers, Food Processing and Plastics. Its success stems from the application of innovative technologies, strong positioning on the world market, continuous quality-oriented research and outstanding customer service.

SACMI Group has production plants, distribution companies and service companies in 26 countries, and the parent company in Imola (Bologna, Italy) now controls over 70 firms. A far-reaching presence that explains why 89% of Group sales comes from exports.

SACMI Group provides efficient assistance and services all over the world thanks to a Global Network of approximately 30 companies, which provides customers with fast, efficient, direct service on every continent.
